CERTIFICATION

AWS Cloud For Beginner (2025)

Cybersoft Training Center
Java Web Back-End Developer (2023)

Software Development Lifecycle (2023)

LANGUAGES

English: TOEIC-based proficiency

TRINH ANH QUAN

JAVA DEVELOPER

OVERVIEW

Java Developer with practical experience in backend development. I aim to continue strengthening my Java skills through real-world projects and gradually advance to a higher-level Backend Developer role with greater expertise and responsibilities

WORK EXPERIENCE

IRTECH VIETNAM **Mar 2026 - July 2026**

Fresher Java - Lot 22 A4, Nguyen Sinh Sac Street, Da Nang

- Developed ePort digital port gate system, built integration APIs with CATOS/GTOS, and collaborated with the team to analyze complex logistics requirements and design optimal technical solutions

SAPOTACORP **Apr 2025 - March 2026**

Fresher Java - 101 Huynh Tan Phat Street, Hai Chau, Da Nang

- Built RESTful APIs with Spring Boot, and maintained production systems in Agile environment with frontend/QA teams

FPT SOFTWARE DA NANG **Sep 2023 - Dec 2023**

Intern Java - FPT City Urban Area, Ngu Hanh Son, Da Nang

- Supported backend development in Java/Spring Boot and gained hands-on experience with RESTful APIs and database integration

TECHNICAL SKILLS

Programming Languages: Java (Core Java, OOP), SQL
Frameworks & Libraries: Spring Boot, Spring Security, Spring Data, Hibernate
Databases: MySQL, SQL Server, PostgreSQL, Oracle Database
Backend & Architecture: RESTful API, Microservices-oriented design, Design Patterns, Authentication & Authorization
Messaging & Caching: Redis, RabbitMQ
Testing: Unit Testing with coverage of negative and edge cases
Tools & DevOps: Docker, Git (GitLab, Bitbucket), Postman
Cloud: AWS, basic cloud deployment
Frontend: Basic HTML, CSS, JavaScript, ReactJS

EDUCATION

FPT UNIVERSITY DA NANG **Dec 2020 - May 2025**

- Major: Information Technology
- GPA: 3.13/4

CYBERSOFT ACADEMY **Apr 2023 - Oct 2023**

- Professional Back-End Java Developer Course
- GPA: 9.2/10

WORK PROJECTS

ePort Da Nang Port - Digital Port Gate & Terminal Operations Management System **(03/2026 - 07/2026)**
Tech Stack: Java 8, Spring Boot 2.5, MyBatis, Oracle, Thymeleaf, jQuery, Liquibase
Team Size: 5
Position: Backend Developer (Java)
Key Responsibilities:

- Built admin screens for progressive pricing: admins can view, add, and edit price rules by customer, import/export Excel, and validate data before saving
- Implemented billing/invoice report features that load container data from external port systems and apply configured progressive price rules
- Built vessel registration lookup: users enter vessel name or IMO, the system searches vessel master data and auto-fills details on the form
- Fixed production bugs, improved Oracle queries, and clarified unclear requirements with BA before coding

Klekoon - A public procurement monitoring and e-sourcing platform **(09/2025 – 02/2026)**
Tech Stack: ASP.NET MVC, C#, .NET Framework, SQL Server, Entity Framework, Dapper, jQuery
Team Size: 6
Position: Backend Developer (.NET)
Key Responsibilities:

- Implemented contract selection features: bookmark contracts and keep the selection counter accurate
- Implemented the notification feature: create alerts when tasks, notes, or assigned users change, and display them in the notification bell
- Collaborated with the client team to test, review, and deliver each ticket

HDSaison - A banking platform supporting loan processing, user applications, document management, and workflow automation, with an admin portal for managing products, fees, users, notifications, content, and orders, while providing applications for users to submit loans **(04/2025 – 10/2025)**
Tech Stack: Java 17, Spring Boot 3.1, PostgreSQL, Redis, RabbitMQ, Feign Client, AWS S3
Team Size: 8 members
Position: Backend Developer (Java)
Key Responsibilities:

- Implemented and updated notification APIs to show unread counts, filter notifications by type and read status, return the latest notification for each related item, and mark notifications as read
- Updated how add-on products, such as loan insurance, and product fees are stored and calculated, including fixed amounts and percentage-based charges
- Fixed backend bugs and API issues across customer and product features based on frontend and QA feedback, checked fixes with test data
- Participated in daily stand-ups, sprint planning, and code reviews, while following team standards for code quality, performance, and security
